

REMARKS

The current amendment corrects a typographical error in claim 37. Claim 37 erroneously recited a method. Claim 37 depends from intervening claim 36 and base claim 27, which recite a transmission component. Therefore, the Applicant has amended claim 37 to properly recite a transmission component.

Thus, no substantive amendment has been made. This amendment is made before or with payment of the issue fee. Therefore, Applicant respectfully requests entry of the foregoing amendment without withdrawing the application from issuance.

Respectfully submitted,

Steven W. Smith
